Professional Summary

Motivated and detail-oriented aspiring Software Engineer with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and Java. Proficient in problem-solving, with regular coding practice on platforms like LeetCode to strengthen algorithmic thinking and coding skills. Experienced in Full Stack Development using React.js, Node.js, Express.js, and MongoDB through hands-on project development. Familiar with DBMS, RESTful APIs, and authentication systems. Passionate about building efficient, scalable applications and continuously expanding technical expertise to contribute to real-world software solutions.

Experience

ArogyaPandit — Full Stack Developer Intern **July 2025 – Dec 2025**

- Built and maintained backend services for Gogy, a school-management and education platform, developing 12+ REST APIs using Node.js, Express.js, and MongoDB
- Integrated secure authentication and Google OAuth using Passport.js, streamlining login for 500+ active users and eliminating manual credential handling
- Optimized REST API response times by **~25%** through query optimization and MongoDB indexing, improving overall application reliability
- Collaborated with a **4-member engineering team** to design and deliver database schemas and API endpoints across 3 core modules (student records, attendance, and admin dashboard)

Projects

Genuine Chat App (Full Stack**)** | React,Express, MongoDB, Socket.IO,Docker

- Built a full-stack real-time chat application using React, Node.js, and MongoDB with secure authentication.
- Implemented real-time messaging using Socket.IO for instant bidirectional communication
- Containerized the application with Docker for streamlined deployment and development.

DriverGuardAI (AI Project)| Python, OpenCV*, React.js, MediaPipe,MongoDB, Express.js*

- Built a driver drowsiness detection system using OpenCV and MediaPipe for real-time face and eye tracking
- Integrated a Python-based detection service with a React frontend through API communication.
- Added alert and logging functionality to track driver safety status in real time.

User Analytics Dashboard | React.js, Node.js, Express.js, MongoDB
GitHub | Dashboard | Event Demo

- Built a real-time analytics platform to track user events, page views, sessions, and click interactions
- Developed a custom event-tracking pipeline and a responsive analytics dashboard
- Implemented REST APIs for event collection, analytics aggregation, and dashboard reporting

Invoice Generator (Full Stack) | React.js, Node.js, Express.js, MongoDB, PDFKit | GitHub | Live

- Built a full-stack invoice management system with JWT authentication, client management, and secure REST APIs
- Built PDF invoice generation and email/OTP workflows using Nodemailer and Brevo
- Deployed the application on Vercel and Render with environment-based configuration

Technical Skills

- Languages: Java, JavaScript, TypeScript, Python
- Frontend: React.js, Next.js, Tailwind CSS, Bootstrap
- Backend: Node.js, Express.js, REST APIs, Passport.js, WebSockets
- Databases: MongoDB, MySQL, Redis
- Tools: Git, Docker, Mongoose, OpenCV, MediaPipe
- Concepts: OOP, DBMS, Data Structures & Algorithms, System Design

Education

Bachelor of Technology in Computer Science **October 2023 – June 2027***
The Technological Institute of Textile and Science **Bhiwani ,Haryana**
CGPA – 8.4/10

Achievements & Certification

- College Hackathon Finalist | Aug 2025
- Smart India Hackathon (SIH) 2024 & 2025 – Participant
- Deloitte Technology Job Simulation – Forage | View Certificate
- Level 1: E-Commerce – Unstop | View Certificate
- Complete Web Development Course (100 hrs) – Udemy | view Certificate
